

SANFORD LIMITED
SUSTAINABLE SEAFOOD

20 August 2013

Press Release

The Pacinui is a vessel owned by Juahm Industries operating under charter in New Zealand to Sanford Limited.

Sanford is conducting its own internal investigations into claims that on-board machinery for separating ship-board waste was not used correctly. Sanford understands the claims have been made by former Indonesian crew members of the Pacinui. These claims have led to three charges being laid by Maritime New Zealand against Sanford Limited under the Maritime Transport Act. The charges relate to an alleged failure to use the equipment on one day in January 2013.

The case is due to be called in the Timaru District Court on 26 August.
